

Deco World Exports: Presents

**“WATER BEARERS”
FROM THE WORLD OF
COPPER**

Copper

- ▣ It is a soft, malleable, and [ductile](#) metal with very high [thermal](#) and [electrical conductivity](#). A freshly exposed surface of pure copper has a reddish-orange color.
- ▣ "Copper is a growing trend," says Wendy Miranda, the customer ambassador at Lakeland.
- ▣ This range is inspired by copper-crazy chefs on TV program such as 'Great British Menu' and also from the Indian heritage of using copper saucers for drinking water.
- ▣ Food served in copperware can be toxic for human consumption. Therefore, [Deco World Exports](#) has coated this range with food safe lacquer to ensure health of the consumers.
- ▣ All the articles in this range are [handcrafted](#) by the artisans of the [Metal Handicraft capital](#) of the [world](#), city of [India](#) 'Moradabad'. They are made of pure metals and authenticity is guaranteed.
